Subject: 2012 Annual Progress Report

Thanks for responding to comments and adding the Match funds to your report. The final version dated May 24th looks good. I will get to work on finalizing your PPD now.

Things to consider for next year's report:

- If you can report the water quality trends in the projects where you are working with 319 (federal and Match) in the Annual Progress Report in future years, that would be helpful. Reporting out on incremental improvement in your projects is one of the components of the PPD. I tried going to your online 305b Water Quality Assessment database to see if I could find some of the trends but was unable to do so. Let me know if I am just maybe not navigating the page correctly.
- As always, please consider the option of trying to get load reductions from some of your other leveraged funds and partners in the future.
